Adding Hangouts and Hangouts Meet video chats to your Google Classroom.

Adding resources to Google Classroom
Google classroom is the place to host all your classwork and documents. Google Classroom is the front page for your drive and allows you to share things that are in your drive to others who are enrolled in the class.
Classroom allows you to send out document and work to be done via Assignments
Classroom has different options for types of task to set Questions, Docs, Sheets, Quizzes and anything that can be hyperlinked (eg A Hangout or Meet)

Adding video chats to a class
If you cannot be in the same classroom as the members of your class then hangouts or hangouts meet can be used to connect with them.

Step One - open your calendar and add a new event on the date you wish the chat to occur.
Fill in the date and time then click add conferencing. This will create a hangout or meet that you can share with your group.

If you are using Hangouts you can right click or ctrl click to copy the link to the hangout

stevesmith.org.nz
Choose to ‘Copy link address” and post this to your classroom as a ‘Material’ post. The Students can then click on the link at an agreed time (posted on your classroom or shared via the class calendar) to open the hangout chat.

You can also add Hangouts Meet to a calendar event. Start a new event, choose the date and time and then choose add conferencing.

Add participants by emails or a Google Classroom name eg L1Geo2020
You can now copy the Hangouts Meet link or join code from the calendar entry.

This link can be sent via email or added to a Google Classroom post to allow students to join the Hangouts Meet.

If you add a calendar event and choose your class calendar to add it to, the event with hangout will appear in the student’s calendar too.

If you are using Hangouts Meet then you can go to meet.google.com and click on join/start a meeting. Add a Hangouts meet name for your class eg ‘tgs12bio2020’. This join code or link can be given to students (via classroom or email) to allow them to join the chat at an agreed time and the meeting will begin. Instructions for this can be seen here.

The Meeting ID (as shown above) can be entered direct at meet.google.com as well, ie for this one it is fww fkhw vea. So go to meet.google.com then at the welcome screen add this code to join

Sharing your Screen

Once you are in a Hangout or Meet you can choose to share your screen so the other people in the call can see what you have on your screen.

In hangouts click the three dots at the top left and then choose share screen

When you are finished choose stop sharing to return to the call

In Meet click ‘present now’ in the bottom right of the screen

When you are finished choose stop sharing to return to the call

Slides of the above info can be seen here

A Google Site of Help videos can be found here
